Advanced Presentations

Duration

2 days

Audience

Delegates who have attended 'Effective Presentations' or who are experienced in presenting and wish to develop their existing skills further.

Objectives

This Workshop aims to build on essential presenting skills by exploring more advanced skills with a practical 'hands on' approach, and considering where these new skills may best fit in to the structure of a presentation.

Overview

The course will commence with a short presentation from each delegate followed by feedback. From this session delegates can then focus on the key skills they feel they would get most benefit from during the two days. They will then use these new and enhanced skills in a further presentation at the end of the second day.

The focus of this Workshop is very much on practical application and discussion of individual skills and putting them into practice in the final presentation.

The scope is wide ranging, covering all key presentation skills.

Key areas for focus are:

- Influencing
- Verbal and non verbal communications
- Positive projection
- Presentation diversity
- Challenging situations

The two day programme provides the delegates with more time to adjust their presentation following the input, and to also have more in-depth feedback on their presentation.
